REGIMEN GUIDE

This guide has been prepared to best meet the needs of our valued users and to help them maximize the benefits of our products. Additionally, it provides sample regimens to seamlessly integrate BioBalance products into an effective skincare routine.

SERUMS SHOULD BE THE FIRST STEP

Serums should be the first product applied to the skin after cleansing and toning.

Application order: Water-based serums→Emulsions→Water-free serums→Oil-based products

- If a product is **transparent** and contains **Aqua or Water** in the ingredients list, it is a water-based serum.
 - If a product has a **milky texture**, it is an emulsion.
 - If a product is **transparent** but does **not** contain **Aqua/Water** on the label, it is a **water-free serum**.
 - If the label includes oil, it is an oil-based serum.

APPLICATION ORDER

- Apply **Super Serum** to cleansed skin and allow it to absorb.
 - Follow with another serum or a moisturizer.
 - If using two serums, the final serum (e.g., **Vitamin C, Hyaluronic Acid, Collagen, Niacinamide, or Retinol Super Serum**) can also be mixed with a moisturizing cream before application.
 - Always complete your morning routine with sunscreen.

RECOMMENDATION FOR SENSITIVE SKIN

For sensitive skin, **Super Serums** containing potent actives such as **Niacinamide, Retinol, or Vitamin C** can be better tolerated by the skin if applied to **damp skin** or **mixed with a moisturizer** before application. This helps reduce potential irritation while ensuring effective absorption.

BIOHERAPY

Herbal Science

REGIMEN GUIDE

NUMBER OF PRODUCTS & EXCEPTIONS

- Use a maximum of **three products** to ensure proper absorption by the skin.
 - **Salicylic Acid and Glycolic Acid:** After applying these serums, **two additional serums** and a **moisturizer** can be used.

CAN FACE SERUMS BE APPLIED AROUND THE EYES?

Since **Super Serums** contain **high concentrations of active ingredients**, they should **not** be applied directly to the eye area, except for those specifically formulated for this purpose.

However, to enhance the **anti-aging** effects of a regular eye cream, you can mix a small amount of Vitamin C, Collagen, or Hyaluronic Acid serum into it before application.

CONSISTENT USAGE IS KEY:

Regular and continuous application is essential. Visible improvements may require up to 8 weeks of consistent use.

TO SUPPORT YOUTHFUL-LOOKING SKIN LONGER:

- Always use an **SPF 50+ sunscreen**.
- Never expose your skin to the sun **without protection**.
- Even when wearing sunscreen, **avoid direct sunlight** on your face.
- Wear **protective clothing** such as hats and sunglasses.
 - Maintain a **healthy diet** and drink approximately **2 liters of water daily**.
- Avoid smoking and **limit alcohol consumption**.

ATTENTION:

Ingredients such as **Retinol, Arbutin, Glycolic Acid, and Salicylic Acid** can **increase skin sensitivity to sunlight**. When using these ingredients and for **one week after discontinuation**, apply **sunscreen** daily to protect your skin.

New Product Alert! Face Mist Serum

The Power of a Serum, The Lightness of a Mist

In today's world, a traditional skincare routine limited to morning and evening is no longer enough. Throughout the day, skin is exposed to environmental stressors, digital screen light, and pollution — all of which demand continuous support and protection.

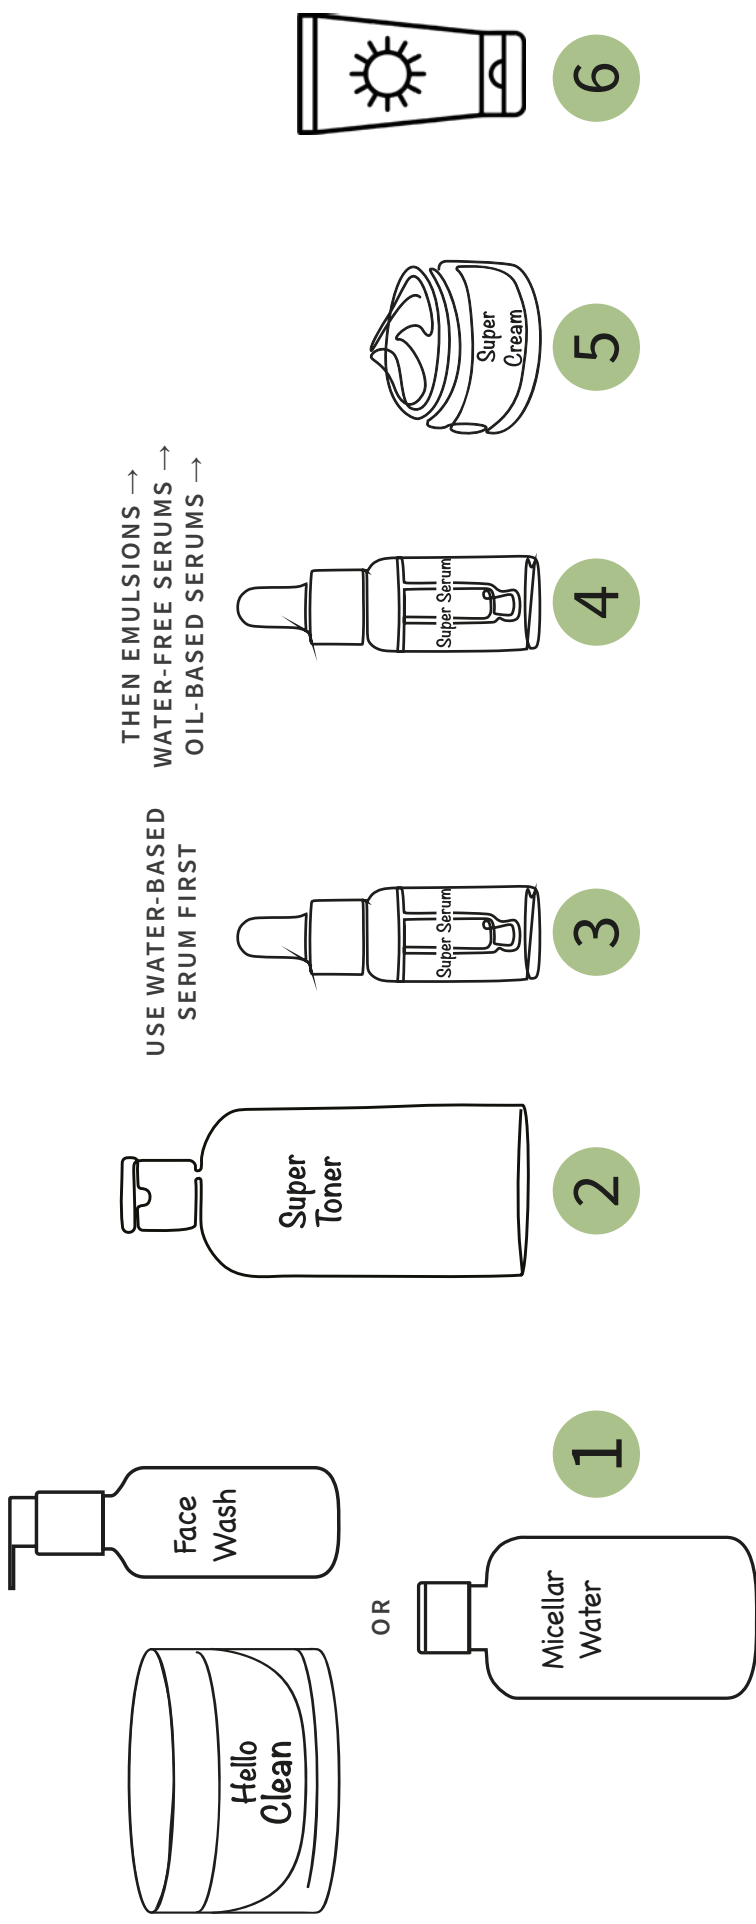

Biobalance Mist Serums and **Sun Mist** go beyond completing your skincare routine — they redefine it, offering **effective care and protection anytime, anywhere.**

Mist Serums combine the intensive active power of a serum with the lightness and ease of a mist. It instantly hydrates, revitalizes and nourishes the skin. Perfect for those who want to refresh and support their skin throughout the day, it can be applied over makeup without disruption — making it an ideal on-the-go skincare solution.

Sun Mist offers the most convenient way to reapply sun protection throughout the day. Its **lightweight, invisible SPF** provides comfortable wear without leaving any residue, while the **mess-free formula** keeps your makeup perfectly intact. With its practical spray format, reapplication is effortless — **anytime, anywhere.**

HOW TO COMBINE MULTIPLE FORMULATIONS FROM BIOBALANCE IN A SINGLE REGIMEN?

Before applying your serums, start by cleansing your skin thoroughly.

You can either use Micellar Water as a single-step cleanser, or follow a double cleansing routine by using an Oil-Based Cleansing Balm, followed by a Face Wash for deeper purification.

If you are using two serums, you can apply the second serum (e.g., Vitamin C, Hyaluronic Acid, Collagen, Niacinamide, or Retinol Super Serum) by mixing it with a moisturizer before application.

For more information on serum formulations (e.g., water-based, emulsions, etc.), please refer to the last page of this guide.
